

ASSMANN ELECTRONIC GmbH

ASSMANN System Guarantee

DIGITUS[®] Copper Cabling System

Appendix C – Guarantee claim and contract document

1. Contract and product information

Contract number of the DIGITUS[®] system guarantee:

The prerequisite for this is that the following guarantee-specific documents are met in their latest versions:

- *General guarantee conditions*
- *Appendix A – Solutions eligible for guarantee cover*
- *Appendix B - Provisions for acceptance*
- *Appendix C – Guarantee claim and contract document*

Number of permanent link transmission paths claimed:

Number of permanent link transmission paths certified:

2. Installed components:

Note

See appendix A for the possible component configuration.

Mixed usage of DIGITUS[®] copper components means that the ASSMANN's 25-year system guarantee will be granted based on the lowest category or class of the components used.

Do not combine shielded and unshielded components.

The claiming party hereby acknowledges that a copy of the calibration certificate is annexed to the claim. The last calibration run should not be more than 15 months ago!

Testing of the cabling links was performed with the following measurement devices:

Mail the test data in a file format to systemwarranty@assmann.com or send them on a conventional data storage device (CD, DVD, USB stick), together with the claim and all required certificates.

Please note:

Measurement devices and specific file formats not listed in the provisions for acceptance are **not** permitted! Name the documents and data storage devices in a way so that they can be linked to the project.

The undersigned confirms that the measured values are consistent with the values obtained in the above project, and that all stored data are within the threshold values of the specific class or category and the applicable standard.

3. ASSMANN System Guarantee

ASSMANN's 25-year system guarantee will be granted on the basis of the presented data and as provided for in our general guarantee conditions.
